Layouts and Shortcuts

[Full Keybindings List Mac](#)

[Full Keybindings List Windows](#)

[Full Keybindings List Linux](#)

ctrlCmd – Control on Windows, Command on Mac*

VS Code Layout

- **ctrlCmd + Shift + B** - Toggle side bar
- **ctrlCmd + Shift + B** - Toggle debug
- **ctrlCmd + Shift + B** - Toggle file editor
- **ctrlCmd + Shift + B** - Toggle Extensions
- **ctrlCmd + Shift + B** - Toggle git
- **ctrlCmd + Shift + B** - Toggle search
- **ctrlCmd + K Z** - Toggle Zen Mode
- **ctrlCmd + Shift + P** - Command Palette

Split Editor and Grid Tab System

- **ctrlCmd + number (1, 2, 3)** - switch to Nth editor group
- **ctrlCmd + ** - move file to split editor

Opening and Working with Files

- **Ctrl + Tab** – tab to next file
- **Ctrl + Shift + Tab** - tab to previous file
- **ctrlCmd + P** to quick open files
- **ctrlCmd + N** to create new file
- **ctrlCmd + Shift + N** – new window
- **cntrlCmd + W** – close file
- **cntrlCmd + S** – save file

Navigating and Manipulating Text

- **Option + Left/Right | Ctrl + Left/Right** – Navigate word by word
- **Cmd + Left/Right | Home/End** - Go to beginning/end of line
- **Cmd+ Up/Down | Ctrl + Home/End** - Go to beginning/end of file
- **ctrlCmd + D** – select current word
- **Cmd + Ctrl + Shift + Left/Right | Shift + Alt + Left/Right** - expand/shrink selection

- **Alt + Up/Down** - move line
- **Shift + Alt + Up/Down** – Duplicate line
- **ctrlCmd + C** - copy selected text or line
- **ctrlCmd + X** - cut selected text or line
- **ctrlCmd + V** - paste
- **ctrlCmd + Shift + K** – delete line
- **Cmd + Option + Shift + Up/Down | Ctrl + Shift + Alt + Up/Down** - Multiple Cursors
- **ctrlCmd + Shift + ** - jump to matching bracket

Find and Replace

- **ctrlCmd + F** – Search in current file (with and without selected text)
- **Alt + Cmd + F | Ctrl + H**– Search and replace in current file (with and without selected text)
- **ctrlCmd + Shift + F** – Search in workspace (with and without selected text)
- **ctrlCmd + Shift + 1** - replace next
- **ctrlCmd + Shift + H** – Search and replace in workspace (with and without selected text)
- **ctrlCmd + Alt + Enter** – replace all
- **ctrlCmd + Shift + L** – select all occurrences of current selection
- **ctrlCmd + F2** – select all occurrences of current selection

Emmet

Emmet provides shorthand snippets to generate HTML and CSS.

Debugging

[Debugger for Chrome Extension](#)

Debugging frontend JavaScript

```
{
  "type": "chrome",
  "request": "launch",
  "name": "Launch Chrome against localhost",
  "url": "<http://localhost:8080>",
  "webRoot": "${workspaceFolder}"
}
```

Debug Configurations for Server Side JavaScript (Node.js)

Launch Node (replace program with your server file)

```
{
  "type": "node",
  "request": "launch",
  "name": "Launch Program",
  "program": "${workspaceFolder}/app.js"
}
```

Attach to Process (you will need to run your application first with `node --inspect server.js`)

```
{
  "type": "node",
  "request": "attach",
  "name": "Attach by Process ID",
  "processId": "${command:PickProcess}"
}
```

Attach to Port (you will need to run your application first with `node --inspect server.js`)

```
{
  "type": "node",
  "request": "attach",
  "name": "Attach",
  "port": 9229
}
```

Attach to Port using Nodemon (you will need to run your application first with `nodemon --inspect server.js`)

```
{
  "type": "node",
  "request": "attach",
  "name": "Attach",
  "port": 9229,
  "restart": true
}
```

Debugging Angular CLI Applications

```
{
  "type": "chrome",
  "request": "launch",
  "name": "Launch Chrome against localhost for Angular",
  "url": "<http://localhost:4200>",
  "webRoot": "${workspaceFolder}"
}
```

Debugging Create React App Applications

```
{
  "type": "chrome",
  "request": "launch",
  "name": "Launch Chrome against localhost for React",
  "url": "<http://localhost:3000>",
  "webRoot": "${workspaceFolder}/src"
}
```
